THE MOST POWERFUL RESIDENTIAL HEATER AVAILABLE

1,800 Watts of Heating Power! Highest Wattage Available for Home Use!

Apollo[®] 2000

PORTABLE OSCILLATING INFRARED SPACE HEATER WITH REMOTE CONTROL

The Apollo 2000 is a portable space heater with style! Its sleek design uses all new materials for faster heating and greater efficiency, protecting against overheating or if the unit is tipped off balance.

Apollo 2000 senses the temperature in its environment and adjusts itself accordingly, working faster or slower to achieve the desired temperature. A large digital touch control panel displays the temperature while providing various heating modes, timer options, and oscillating controls.

A remote control with the same functions as the display panel is included. Just turn it on, set the temperature, and Apollo 2000 does the rest.
